Expt. 11

Simulate static routing configuration using cisco packet Tracer.

Aim:-

To simulate a static routing configuration using cisco packet.

Procedure:-

* Open cisco packet traces and create the given network topology.
* Connect 3 routers and PC's using simulate cable.
* Configure IP address for router and PC's.
* Enable all router interfaces using no shutdown.
* Configure static router on router0, router1 and router2 using IP Mobile.
* Thus a static routing is successfully Configured and verified.

Result :-

Thus static routing configuration was successfully configured using CISCO packet tracer.
