Exp. 12 End to end communication at transport layer.

Aim:-

To implement an echo-client server using TCP/UDP socket and implement a chat client-server using socket programming.

Procedure:-

1) Create server program and client program.

2) Import the required socket library

3) In server, creates a socket and bind it to an IP address and port.

4) Make the server listen to client request.

5) Start client and connect to server.

6) enter arg from client.

7) Send sms to server.

b) client server using socket program

1) Create server and client program using secket programming.

2) Start client & connect it to server

3) Container sending to receiving to performance

4) Close the connection.

Result:

The end to end communication was successfully implemented using TCP/UDP sockets.
